As a pre-professional program, the BAS degree is structured in a specific way, year by year, to ensure the pedagogical content is sequenced by academic year and coordinated within each year. Some courses have specific prerequisites and all courses are interrelated and therefore courses cannot be taken out of sequence. Design studio courses must be successfully completed before being allowed to register for the following year of Design. All mandatory courses each year must be successfully completed to proceed in the program.

Students are responsible for selecting and registering for their own elective courses according to their academic preferences and schedule.

If you have any questions about the program, please write to the program coordinator:
